MIDTOWN
MODERN

Behind the Design

on the cover

This colorful family-friendly dining room from Hibou Design was designed for both every-day dining as well as entertaining. Custom elements include turning a nook into a built-in bar with two open shelves in white-oak stained to match the flooring. The floating shelves are perfect for displaying accessories while the subtle geometric wallpaper and brass wall sconces further add the decorative elements of the nook.

The bar surface is durable quartz and could also play double duty as both a bar for hosting and as a buffet perfect for serving easily during the festive season.

An oversized pendant fixture brings some attention back to the dining table and ties in the black accents found within the shelves. The jewel-toned cabinetry in Benjamin Moore Miramichi was selected to coordinate with the velvet dining chairs, to bring in a bold color to this stunning room.

GREEN AND GROUNDED

The color emerald symbolizes balance, harmony, and vitality, whereas green, in general, signifies abundance, prosperity, and growth. We can't think of a better space to evoke these states of positivity than the dining room—a space where family and friends gather to share everything, from life's daily pleasures to the most cherished celebrations of each year. Aesthetically speaking, its deep tone helps to ground the room and add general interest to the aesthetic. Linear wood shelving creates space for ever-changing touches of personal or seasonal interest, while an oversized yet simple pendant light demands just the right amount of attention.

PERFECTLY BALANCED

Indicative of the penthouse apartment it's situated in, this dining room is certainly a head turner. The scale of its floor-to-ceiling, sleek stone fireplace and sky-high ceiling can't help but make this room feel larger than life. Yet, combined with softer, natural materials and textures, the space becomes welcoming and serene. The oversized woven pendant balances the scale of the fireplace while offering a relaxed, unfettered feel. The round dining room table offers intimacy, and the linen slipcovered chairs offer an additional layer of comfort. The balance of both bold and relaxed elements is what makes this design so appealing.
