# HOLIDAY TABLESCAPES

Bringing us back to simpler times, these holiday-inspired spaces feature all the comforts of home and family.

## CLASSICALLY CHRISTMAS

Flawlessly minimalist and equally chic, this table setting features natural greenery for a touch of purity, plus tall candlesticks that bring height to the space. The gold hanging light fixture accentuates the simplistic beauty of the raw wood table, while carefully folded gray napkins sit atop delicate dinnerware, bringing forth an understated—but perfectly executed—elegance. Crystal glassware completes the look with a classy finish that draws your eye to the united design of this holiday table setting.
